

Tie - Tex

Stitch Bonded Polyester Fabric

Product Description and Uses

Tie-Text is one of the strongest and most versatile materials available for use as reinforcement in cold process roofing. This product uses a parallel fiber structure which allows roof coatings to quickly wet out and totally saturate. **Tie-Text** is a soft polyester mat that will conform to embedded gravel as well as standing seam metal roofs and is used on a variety of other substrates:

- Plywood and Concrete
- Built up Roofing
- Mineral Roll Roofing
- Sheet Metal Roofing
- Tar & Gravel
- Brie Rubberized

Sizes Available

- 4" wide x 300' rolls
- 6" wide x 300' rolls
- 12" wide x 300' rolls
- 20" wide x 300' rolls
- 40" wide x 300' rolls

Advantages

- ✓ Creates a tough seamless roof system when combined with cold roof process additives.
- ✓ Complete weathproofing. Withstands wind, driven rain, salt spray, and ponding water.
- ✓ Resistant to UV degradation.
- ✓ Light weight – minimizes structural requirements in new construction, may eliminate tear offs in remodeling.
- ✓ Low maintenance, easy to repair.
